PROJECT

HTML Mockup

---

Hello Patrick,

Great job with your mockup. The project meets specifications. It looks great and seems to be fully-functional. The mockup page demonstrates your understanding in creating different layouts for the webpage.

I have some suggestions in your evaluation below, to make it align with Google Style Guide.

We look forward to seeing your submission for the next nanodegree project!

**Design****Meets Specifications**

- The DOM tree correctly represents the page content. Nice use of Bootstrap.
- Page elements use semantic tags where appropriate.
- Design uses grid-based layout principles.

**Responsiveness****Meets Specifications**

- The page is responsively designed
- Page renders correctly across a range of devices and browsers.

**Separation of Concerns****Meets Specifications**

- Page completely separates structure (HTML) from design/style (CSS).

**Code Quality****Meets Specifications**

- Code is mostly formatted to align with the Google HTML/CSS style guide (located [here](#)).

- Make sure to check indents and trailing whitespaces in your code!
- Omit type attributes in style elements.
- Run your HTML code through the W3C Validator

## PROJECT EVALUATION

### **Project Meets Specifications**
